Honda GX390 / GXV390 Frame Mount LPG Dual Fuel Conversion Kit

Prod Code: 3010-GX390-19134

This is a conversion kit to convert a Honda GX390 OR GXV390 to LPG. The conversion will also enable the user to run the engine on either petrol or LPG.

The kit will arrive with all LPG fittings secured and the LPG hose must be cut to lengths to suit your frame size.

Two examples are shown in the images. As pictured, the silver demand regulator MUST be fixed in an upright position, and for optimum reliability, it should be positioned as close as possible to the carburettor

On the GX390, this kit fits the high mount air filter type ONLY, as pictured.

With this type of kit, to turn the engine off, you MUST isolate the LPG supply by turning the LPG bottle off before turning the engine ignition off.

A quick release coupling kit can be purchased additional to this LPG kit.

SPECIFICATIONS

Approximate Fuel Consumption	1.8kg/h @ 75% load
Alternative option for this kit	European bottle regulator
Fuel Type	LPG Propane
