

# Honda FF500 Large Tiller

**Prod Code: 4030-HOND-FF500**

The powerful FF500 is also easy to handle. The unique design with large rear drive wheels and front tines ensures maximum stability and straight line performance, yet allows tight turns and simple one-touch depth adjustment.

Honda's unique counter-rotating mechanism rotates the inside tines in a clockwise direction while the outside tines are rotated counter-clockwise. This enables hard soil to be broken up easily and makes the unit stable and easy to operate.

Stable and easy to manoeuvre machine. Till to the edge of the plot leaving no patch unturned.
