AC33 Alpha Series 33kVA Cummins 3-Phase Generator

Prod Code: 5000-CPS-AC33

The CPS AC33 Alpha Series 33kVA (26.4kW) Generator is a unit designed and manufactured in the UK.

Built with a Cummins Diesel Engine, MeccAlte or Stamford Alternator and Deep Sea Electronic Control Module, all of which are manufactured in the UK. The base frame is constructed from galvanized steel, press-formed, with suitable thickness; bolted by galvanized bolts and contains the large fuel tank to enable long running.

Optional extras on this range include - 110V, 230V & 415V socket arrangements, water heater for cold starts, 3-way fuel valve for an external tank, quick release doors, road tow trailer mounting, generator synchronizing, and even a canopy colour of your choice.*

This generator is covered by a full 2 year or 2000 hour manufacturer's warranty and all sets are fully manufactured as per your requirements

SPECIFICATIONS
