## **Cellmaster 40kVA** 3-Phase LPG / NG **Generator**

Prod Code: 5000-SUTT-19596

The CELLMASTER LPG Generators have security at heart, and uses a locking bar to secure all four access points allowing the generator to be fully protected using a single padlock. Enhanced acoustic attenuation makes the CELLMASTER a perfect addition to industrial, commercial, and residential applications.

- 1500 RPM Super silent
  Ultra-low vibration
  3 or single phase
  Built in AMF
  Single locking point

Cellmaster machines are three phase 400/230V 50Hz. Other phase & voltage configurations are available

| SPECIFICATIONS                 |                   |
|--------------------------------|-------------------|
| Continuous Rating Output (kVA) | 40                |
| Continuous Rating Output (kW)  | 32                |
| Phase                          | Three             |
| Engine                         | Zenith Z644       |
| RPM                            | 1500              |
| Frequency                      | 50Hz              |
| Dimensions (mm)                | L2495 W1050 H1190 |
| Dry Weight                     | 870kg             |
| Sound Level at 7M              | <60 dBA           |
| Consumption at 75%             | 7.8L/H            |
