

AA27 25mm Vibrating Poker (Premium)

Prod Code: 6020-HUSQ-352

The original mechanical poker has been refined over the years to become the reliable, easy-to-use and very versatile product it is today, available with a selection of drive units to suit most work sites. The AA series of pokers is the Atlas Copco top-of-the range mechanical pokers featuring high centrifugal force and rapid acceleration for the best result.

Features & benefits

- 6 m long hose
- Hardened steel parts
- Flexible shaft inside a rubber hose protected by steel strip.
- Hose stiffener on large diameters
- Genuine coupling.
- Greased shaft.
- Higher centrifugal force than the AZ poker range

Applications

Medium & low slump concrete - slabs - forms - precast - slump test

SPECIFICATIONS

Radius of action	up to 10 x diameter
Tube diameter	25 mm
Hose length	6 m
Frequency in concrete (vpm)	12000
Centrifugal Force N	570
Tube length	334 mm
Weight	10 kg
Amplitude	0.3 mm
Vibration value	2.46 m/s
Noise level	69 dB(A)
