

TE3-50YD 2" Tsurumi YANMAR Diesel Water Pump

Prod Code: 8000-TSUR-22702

Tsurumi TE3-50YD 50mm Diesel Centrifugal Water Pump

NOW EQUIPPED WITH LARGER 13L FUEL TANK

The TE3-50YD is a heavy duty self-priming pump powered by a Japanese manufactured Yanmar L48 diesel engine. All units are equipped with carbon ceramic mechanical seals and light weight aluminium pump housings to assist with portability. For increased abrasion resistance, it has cast iron volute and impellor. These materials ensure maximum durability for the pumping of clear and black water as found on building sites. All models are housed within protective tubular steel, easy carry frame, and anti-vibration rubber feet. Hose couplings, washers, clips and strainers are supplied as standard.

SPECIFICATIONS

Engine	Yanmar L48
Max output (litres/min)	550
Debris size capacity (mm)	5.5
Inlet/outlet diameter (mm)	50
Total head (metres)	32
Suction head (metres)	8
Pressure (bars)	3.2
Dry Weight (kg)	52
Fuel Tank Capacity	13L
Starter	recoil
Length (mm)	484
Width (mm)	560
Height (mm)	702
