

# Engine Shut Down Thermostatic Control

**Prod Code: 2180-ENG-24027**

A thermostat over temperature shutdown device which uses the oil alert to shutdown the engine. This will prevent over heating, saving the engine from heat damage

To be fitted in front of the recoil / cooling air inlet of the engine, as per images. We set this to 50C (max temp of ambient recommended by Honda)

## SPECIFICATIONS

To be fitted to	air cooled engines with oil alert shutdown
Length of earth wire	51cm
Length of oil alert connection wire	55cm
