Automatic LPG Changeover Valve - Double (Fitted with OPSO)

Prod Code: 3011-GEAR-22761

This item ensures a continuous gas supply to the appliance/installation and automatically switches from the supply cylinder to the reserve cylinder, so you never run out of gas. When the supply cylinder runs out, the window on the changeover turns red so you are alerted that it is empty, meaning you can replace this cylinder and start the cycle again.

Item Specifics:
Bracket & screws
2 x 20" excess flow & non-return propane x W20 pigtails
Pigtail hoses conform to BS3212/2 / using EN16436-1 (Class 3) hose
3/8" male x 1/2" female outlet ball valve with test point
Emergency instruction plaque
Plastic weather cover

OPSO - Residential
Over-Pressure Shut-Off (OPSO) regulators prevent excessive gas pressure from entering a building causing a hazardous condition. The safety shut-off device closes if the regulator outlet pressure rises above the maximum set point or set pressure.

SPECIFICATIONS

Type of Gas	Propane
Outlet pressure	37mbar
Maximum Inlet pressure	16 bar
Inlet Connection	21.8mm LH
Maximum Capacity	4kg/h
