P-SERIES

The P Series are exceptionally quiet and high powered portable generators, for residential areas or working sites where special respect for noise levels is required.

The Pramac P6000 is a suitable generator for use in residential areas or outside normal working hours. This generator is equipped with first class components and complete instrumentation, with a reliable diesel engine. It is the ideal generator for domestic backup power supply or professional use in residential areas.

A silent and compact electric start machine fitted with the Yanmar L100 diesel engine.
