

Meccalte ES16W-150 AVR 5 kVA Single Phase Alternator (j609b)

Prod Code: 5010-MECC-22437

This unit is designed to be fitted to an engine with a 7/8 inch taper shaft (j609b coupling). Check the attached technical drawing to match against your existing coupling. If a different coupling is required, please contact us for availability

This unit can also be run via a belt a pulley with a bearing kit

For more specialist applications, a high performance range of Automatic Voltage Regulator (AVR) machines is available. The ES range is single phase AVR-controlled but designed with brushes and a slip ring to allow for good voltage regulation and improved motor starting; supply loads different than power factor 1.0 such as modern electronics or pumps.

Suitable engines include Honda GX340, GX390 and Briggs XR2100

SPECIFICATIONS

Phase	Single
RPM	3000
Voltage Outputs	115/230
Frequency	50Hz
Power Output	5kw
Weight	25.5kg
Taper Fitting	7/8"

V-TYPE
