

TE3-100YD 4 Inch Tsurumi YANMAR Diesel Water Pump

Prod Code: 8000-TSUR-24909

Tsurumi TE3-100YD 100mm Diesel Centrifugal Water Pump

The TE3-100YD is a heavy duty self-priming pump powered by a Japanese manufactured Yanmar L70 diesel engine. All units are equipped with carbon ceramic mechanical seals and light weight aluminium pump housings to assist with portability. For increased abrasion resistance, it has cast iron volute and impeller. These materials ensure maximum durability for the pumping of clear and black water as found on building sites. All models are housed within protective tubular steel, easy carry frame, and anti-vibration rubber feet. Hose couplings, washers, clips and strainers are supplied as standard.

SPECIFICATIONS

Engine	Yanmar L70
Max output (litres/min)	1300
Debris size capacity (mm)	5.5
Inlet/outlet diameter (mm)	100
Total head (metres)	26.5
Suction head (metres)	8
Pressure (bars)	2.65
Dry Weight (kg)	62
Starter	recoil
Length (mm)	484
Width (mm)	630
Height (mm)	727
